

Radheshyam Bhati

AI Product Engineering | Full-Stack Development | CSE Student

radheshyambhati747@gmail.com | +91 78781 37465 | Jodhpur, Rajasthan | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science and Engineering student at PW Institute of Innovation, Pune, specialising in AI-integrated full-stack products. Placed 3rd Runner Up among university teams from across India at the Yophoria 2025 AI Innovation Challenge (Delhi). Shipped three end-to-end products — spanning civic tech, personal finance AI, and portfolio UX — from zero to deployed. Seeking internships in AI engineering, full-stack development, or product engineering; immediately available for remote, hybrid, or Pune/Jodhpur-based roles.

EDUCATION

B.Tech — Computer Science and Engineering | PW Institute of Innovation (PWIOI), Pune 2025 – Present

- Core modules: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems.
- Focus on applied AI, full-stack development, and product engineering.

Senior Secondary (Class XII — Science) | Gurukul Shikshan Sansthan Sr. Sec. School, Sikar 2023 – 2025

- Completed senior secondary with Physics, Chemistry, and Mathematics.
- Two years of intensive JEE preparation at Matrix Institute, Sikar — built strong analytical and problem-solving foundations.

TECHNICAL SKILLS

Languages: Python, C, C++, Java

Web & Full-Stack: HTML5, CSS3, JavaScript, React, Node.js, FastAPI, Firebase

Databases: PostgreSQL, MySQL, IndexedDB, LocalStorage

AI & Data: OpenAI API, Power BI, Data Analysis, Dashboarding

Tools & Platforms: Git, GitHub, VS Code, GSAP, Lenis, Linux, GitHub Pages

Concepts: OOP, DSA, REST APIs, Client-Side Architecture, Agile Development

PROJECTS

Personal Portfolio Website | 2025

HTML5, CSS3, JavaScript, GSAP, Tailwind CSS, Lenis Live: radheshyam-cod.github.io/Portfolio

- Architected a single-page portfolio with GSAP scroll-triggered animations, 3D hover effects, and parallax micro-interactions, achieving sub-100ms first-paint with zero server dependency via static GitHub Pages deployment.
- Reduced contact form infrastructure cost to \$0 by integrating FormSubmit's serverless API, eliminating the need for a backend entirely.
- Implemented Lenis-powered smooth scrolling, cutting scroll jank to zero frames across all tested browsers.

Browser-Based EVM + VVPAT Simulation | 2025

HTML, CSS, JavaScript, IndexedDB, Chart.js Live: radheshyam-cod.github.io/Online-Voting-system

- Designed a fully client-side EVM and VVPAT simulation replicating real-world voting workflows, enforcing strict one-vote-per-voter rules via hashed EPIC-style voter IDs — achieving 100% double-vote prevention without a server.
- Persisted all vote records across sessions using IndexedDB and LocalStorage, supporting unlimited voters entirely in-browser.
- Developed a Chart.js-powered live results dashboard, delivering real-time vote tallies for educational demonstrations.

Fin-Mate — AI Personal Finance Coach | 2025

Python, FastAPI, OpenAI API, React, Firebase Mumbai Hacks 2025 Hackathon

- Shipped a full AI-powered personal finance coach targeting students and freelancers with irregular income — conceived, built, and deployed end-to-end within a single 24-hour hackathon.
- Integrated OpenAI models to analyse spending behaviour and generate adaptive monthly budgets, with proactive alerts triggered when spending deviated from plan by more than 10%.
- Automated monthly financial report generation, reducing time-to-insight for users from hours of manual review to under 5 seconds.

HACKATHONS & COMPETITIONS

Yophoria Innovation Challenge 2025 — 3rd Runner Up | YoLearn.ai × GLA University, Greater Noida Oct 2025

AI Product Design Track

- Placed 3rd Runner Up among university teams from across India at India's premier AI Innovation Challenge, recognised for execution quality and real-world impact in the AI Product Design category.

HackXios 2k25 | AXIOS × AWS-backed Hackathon Dec 2025

Team Money Mind

- Competed in an Amazon Web Services-backed hackathon; delivered a working product under competition time constraints as part of a cross-functional student team.

Mumbai Hacks 2025 | National Hackathon 2025

- Conceived and shipped Fin-Mate — a full AI finance product — from scratch to deployment within hackathon constraints (see Projects above).

CERTIFICATIONS & TRAINING

- Cyber Job Simulation — Deloitte (via Forage) | Completed: September 2025 | Practical cybersecurity tasks in a simulated Deloitte consulting environment.
- Google Gemini Academy: Transforming Higher Education with AI — Google × STTAR | Completed: December 2025.
- Cybersecurity Course — Skill India / Tech Mahindra Foundation (NSDC) | 10-hour programme | Completed: December 2025.
- Operating Systems Bootcamp (5-Day) — DevTown, in collaboration with GDG VIT-AP & Microsoft Student Chapter MSIT | Completed: February 2026.

ADDITIONAL INFORMATION

Languages: Hindi (Native), Rajasthani (Native), English (Professional)

Availability: Immediately available. Open to remote, hybrid, and Pune / Jodhpur-based roles.

Interests: AI Product Engineering, Open Source Contribution, Competitive Programming, Full-Stack Web Development
