FOCUS AREAS

- AI Product Engineering
- Full-Stack Development
- Problem Solving
- Systems Thinking
- Product Execution

ABOUT

Computer Science & Engineering student at PW Institute of Innovation, Pune, focused on building practical AI and full-stack products that solve real user problems. Proven in hackathon environments — placed 3rd Runner Up at India's premier AI Innovation Challenge in Delhi. Combines strong programming fundamentals with fast iteration and product thinking to ship end-to-end solutions.

PROJECTS

Personal Portfolio Website

2025

Cyberpunk-themed static site · GSAP · Lenis · Tailwind CSS

- Built a high-performance cyberpunk-themed single-page portfolio with GSAP scroll-triggered animations, 3D hover effects, and parallax micro-interactions.
- Integrated FormSubmit for serverless contact form and Lenis for smooth scrolling — zero backend required.
- Deployed as a fully static site on GitHub Pages for zero-latency loading.

HTML5 CSS3 JavaScript GSAP Tailwind CSS Lenis

Browser-Based EVM + VVPAT Simulation

2025

National E-Voting Portal · Civic Tech · Client-Side

- Engineered a fully client-side EVM + VVPAT simulation mirroring real-world voting workflows with hashed EPIC-style voter IDs for one-vote enforcement.
- Built persistent vote storage with IndexedDB & LocalStorage and a Chart.js-powered live results dashboard for educational demonstrations.

Fin-Mate — AI Personal Finance Coach

2025

Mumbai Hacks 2025 Hackathon Build

- Built an AI finance coach for students and freelancers — analyzes spending behavior and generates personalized adaptive budgets using OpenAI models.
- Shipped proactive spending alerts and automated monthly financial report generation within the hackathon timeline.

Python FastAPI OpenAI API React Firebase

HACKATHONS & COMPETITIONS

Yophoria Innovation Challenge 2025

🏆 3rd Runner Up

Oct 2025

YoLearn.ai × GLA University, Greater Noida (Delhi) · AI Product Design Track

- Placed 3rd Runner Up at India's premier AI Innovation Challenge among teams from across the country.
- Recognized for creativity and contribution toward solving real-world AI challenges in the AI Product Design category.

HackXios 2k25

AXIOS × AWS

Dec 2025

Team Money Mind · 29 Dec 2025

- Participated in an AWS-backed hackathon, demonstrating innovation and team-based problem-solving under competition conditions.

Mumbai Hacks 2025

2025

Built Fin-Mate AI finance product end-to-end within hackathon timeline
